Selected new, best of the older

Perennials

Western Grown for Western Planting

The Rocky Mountain and Plains region comprise a distinct climatic area in that the higher altitude, limited rainfall, sudden temperature change, and the length of the growing season have a definite influence on plant growth. Evaporation of moisture from plants is high and must have a more highly developed root system to maintain a normal growth balance. Bark and wood cells also build up resistance to atmosphere and temperature.

Some varieties that do well in lower, more moist climate will not adapt themselves to our growing conditions, and so cannot be considered. Fortunately, however, there are many varieties that have proven their adaptability here, and others are being tried and observed to enlarge the list of plant material especially suited to growing conditions in this area, both in fruit and ornamental stock. We take pride in participating in the leadership in testing plant material and bringing new proven hardy items to our western trade so that our customers may have the best nursery stock obtainable.

There can be only one conclusion in obtaining the greatest value in your purchase of nursery stock; if it is acclimated, correctly grown and properly handled you will realize the maximum results in transplanting; if the varieties are adapted you may expect a successful continued growth.

OUR LOCATION—One mile north of Loveland, Colorado, on Highway 287. We are centrally located in the highly productive agricultural area of Northern Colorado, and within the major fruit growing section of the Eastern Slope. Nursery stock in various stages of development can be seen in our fields throughout the year.

NATIONALL ENDORSED ROSES

Consumers Reports magazine with national circulation, designates Kroh Brothers Nurseries as one of a select number of firms in the United States to be a consistently good and reliable source for roses. We are proud to have our roses merit this unsolicited recognition.

Our annual list of nursery stock is being sent to an increasing number of interested home owners, either by virtue of new requests, or as a result of current patronage. We are glad to send it to you and are especially grateful to those who have recommended our stock to their friends.

OUR NURSERY

**Is one of the best equipped to serve your needs in the
Rocky Mountain Region**

Easy access and prompt service for customers who come to the nursery.

Orders filled efficiently for shipping.

Excellent accommodations for housing our office, warehouse and storage.

Thorough understanding of fruit growing problems for this region, and practically flawless performance of fruit tree stock for orchardists.

Diversified stock for complete landscape planting as well as many items for the gardner who plants incidental items from time to time.

We are always willing to assist you with your Landscape Planting arrangement to the extent of our practical experience. Landscape projects should be worked out well in advance of the Spring Planting rush to avoid disappointment.

Guarantee

All nursery stock is guaranteed to be true to name, and to be free from injurious insect pests and diseases as certified by state inspection; any proving otherwise will be replaced free or original purchase price will be refunded, but no greater liability will be assumed.

It is further guaranteed that all plants delivered are in good live condition; claims to the contrary must be made immediately on receipt of stock. After nursery stock is delivered in good condition, the future progress thereof is beyond our control and further results cannot be guaranteed. With reasonable care, however, we have confidence in successful continued growth of our stock after transplanting; therefore we shall replace once any stock sold at regular retail that fails to leaf out the first summer after planting at one-half the current retail each-rate price f.o.b. the nursery PROVIDED CUSTOMER NOTIFIES US before Sept. 1 following date of planting, with half price remittance accompanying report. Live plants growing in pots or containers carry no replacement discount, since their live condition is obvious at time of sale; simple planting requirements and reasonable growing conditions are the essence of continued successful growth. No replacement can be made on stock given abuse or neglect, planted unseasonably, against our advice or where customer is notified of non-replacement before purchase, or loss caused by winter damage following planting. We reserve the right to cancel replacement on delinquent accounts.

Terms of Sale

Prices are cash with order; C.O.D. orders must be accompanied by at least one-fourth cash; money orders and checks are recommended for remittance; orders with coins and currency should be registered.

Shipping Charges: Quotations for the majority of items in this catalog are based F.O.B. Loveland except as otherwise noted. We feel that this is the fairest method; thereby eliminating the alternative of offering lighter cheaper grades to offset delivered prices. Roses Small Fruits, Mums and Perennials, being more uniform in size are quoted postpaid on orders amounting to \$5.00 or more, Glads \$3.50 or more. Such items as the Smaller Shrubs, Hedge Plants and Fruit Trees in the smaller sizes not indicated Postpaid that can be bundled within the parcel post regulations, may be shipped parcel post, "postage charges collect." Railway Express or reliable fast Motor Freight is recommended in a large number of cases. Such shipments are sent with shipping charges payable for exact amount on arrival. Shade Trees, Balled Evergreens and stock established in containers are sent only by Express or Motor Freight.

Shipping Season: For spring, March 15 to May 10, Early April planting is best. Order in advance if possible.

Planting Service: Charges for planting are estimated on the individual circumstances and are not included in the price as quoted in the catalog.

Please Note: Sizes and prices are subject to change without notice prior to a subsequent price list.

FRUIT TREES and PLANTS

A GUIDE FOR SELECTING VARIETIES OF FRUITS

We doubt whether there is another section that has such a range of climatic conditions as the Rocky Mountain Plains region. Exposure and altitude are more varying factors than latitude. Our mountain range, as a rule, afford zones of protection along the base of the mountains and within sheltered valleys where fruit growing more readily expands to commercial proportions. In many parts of this section, existing plants or fruits have already pointed out what will or will not do well in a certain area. Here are suggestions, however, if you are in doubt as to what might grow best in your locality. In all cases soil and watering should be favorable, and windbreaks where necessary.

SECTION I: In the higher exposed plains of the Eastern Slope, up to about 6,500 feet and the higher mountain valleys — Crab Apples, Gooseberries, Currants, Garden Roots, Hardy Cheyenne developed Strawberries, and the new Dwarf-rich sour cherry.

SECTION II: In the more agricultural sections of the exposed Eastern Slope plains and mountain valleys up to 7,000 feet—All items in Section I in addition to Yellow Transparent, Wealthy, McIntosh and N.W. Greening varieties of apples; Beta Grapes; Hardy Cheyenne developed Strawberries, and new Dwarf-rich sour cherry.

SECTION III: Where there are moderate climatic conditions on the Eastern Slope, especially in the irrigated sections of around 5,000 feet or less, mountain valleys and the Western Slope up to 6,000 feet—All items in Section I and II in addition to Sour Cherries, European Plums, Additional Apple varieties, Pears, Strawberries, Raspberries, Grapes, (advisable to cover raspberries in winter.)

SECTION IV: In the Western Slope districts of 5,000 feet or less and the southern part of the Rocky Mountain region, there are many localities where the more tender fruits, such as peaches, can be grown successfully in addition to all items in Sections I, II, and III.

Young Cherry Orchard—result of fine nursery stock

Cherries

Cherries bear fruit very soon after planting and are very desirable for pies and canning.

Caliper means diameter in inches at the base of the tree trunk. In our practice of producing stocky, well branched trees so necessary for successful development in our western climate, the height to which we grow them is of secondary importance.

Choice of varieties described below alike or assorted.

Size Trunk Caliper	Aprpr. Ht.	Price each in lots of		
		1-4	5-15	15-25
No. 1 9/16-11/16	4 ft. up.	2.00	1.95	1.90
No. 2 7/16-9/16	3½ ft. up.	1.50	1.45	1.40
No. 3 5/16-7/16	3 ft. up.	1.20	1.15	1.10

✓ **ENGLISH MORELLO.** Ripens late July.

Fruit large, nearly black, very attractive. Starts bearing heavily at early age. Sizes 1, 2, 3.

✓ **MONTMORENCY.** The best all around sour cherry grown. Ripens mid-July; fruit large, bright red. Leading commercial variety. Sizes 1, 2, 3.

✓ **EARLY RICHMOND.** Ripens about July 1st; fruit medium sized, red. Size 2, 3.

SWEET CHERRY. Yellow Glass, Windsor. Inquire at Nursery for available sizes.

✓ **HANSEN BUSH CHERRY.** A hardy and very useful type fruit growing to about 4 ft. excellent to supplement tree fruits. Bears many small, sweet dark plum like fruits; starting to bear very soon after transplanting. 2 to 3 ft., each 85¢; three for \$2.25; per ten, \$7.00.

NEW HARDY DWARF SOUR CHERRY

DWARFRICH. This variety was developed at Cheyenne Horticulture Field Station with ancestry tracing back through years of selecting for hardiness and high fruit quality in both USA and Canada to seed imported from Orel, Russia in 1883. It is a true dwarf cherry. The original bush after 16 growing seasons in its permanent location is less than four ft. high and has proven entirely hardy at Cheyenne, Wyoming.

The fruit is similar in shape, color, flavor and flesh texture to the well known Early Richmond pie cherry. Due to its late season of bloom, the blossoms escape most late spring frosts and as a result, the bushes bear regularly.

Dwarfrich is recommended for the northern and central Great Plains where standard sour cherry varieties are not sufficiently winter hardy. Its bush habit covered with white bloom in the spring followed with bright red fruit contrasting to the glossy green leaves in summer, being suitable and desirable for both ornamental planting and fruit production for small properties. Dwarfrich may also be pruned into a dwarf tree.

We offer a limited supply of 2-year plants averaging 9-12" tall at \$1.50 each.

Choice of varieties described below, alike or assorted

Size	Aprpr. Ht.	Price each in lots of		
		1-4	5-15	15-25
No. 1 11/16 to 1 in.	5-7. ft.	\$1.70	1.65	1.60
No. 2 9/16 to 11/16	4-6 ft.	1.40	1.35	1.30
No. 3 7/16 to 9/16	3-5 ft.	1.15	1.10	1.05
No. 4 5/16 to 7/16	2-4 ft.	.90	.85	.80

Summer Varieties

RED JUNE. August. Medium size, deep red, good flavor; productive. Size 1, 3.

YELLOW TRANSPARENT. Ripens in August. A splendid early cooking and eating apple; pale yellow fruit. Hardy, bears young. Size 1, 2, 3.

WHITNEY CRAB. August. Hardy, good bearer; fruit small to medium, striped red and green, fine for eating and canning, sweet and crisp. Size 1, 2, 3.

Fall Variety

WEALTHY. September. Fine, reliable bearer of large red striped, tender, juicy, slightly sub-acid fruit. One of the finest and hardiest apples. Sizes 1, 2, 3.

Crab Varieties

DOLGO. Has very brilliant red fruit of small size, borne freely. Sprightly flavor; makes rich colored jelly. Fall. Size 2, 3.

WHITNEY. See summer apples.

Winter Varieties

DARK RED DELICIOUS. After referred to as Double Red. A much improved Delicious, turning completely red before it is ripe. Size 1, 2, 3, 4.

JONATHAN. Medium size of finest quality, bright red, fine flavor; moderate grower. Size 1, 2, 3.

McINTOSH. Deep red, good size with crisp, tender, snow-white flesh. Has extremely pleasing flavor. Above average in hardiness and dependability. Size 1, 2, 3, 4.

YELLOW DELICIOUS. This beautiful yellow apple is a bright golden yellow, sweetly acid flavor, good bearer, beginning at early age. Size 1, 2, 3.

ONE-TREE APPLE ORCHARD

We regret that we are unable to supply our usual offering of Kroh's hardy grafted "One-Tree Apple Orchard." Supply should be back to normal next season. Only a few odd trees available this season on personal selection at nursery.

Alternate varieties and sizes available. Inquire at Nursery.

Peaches

Peaches are generally not recommended northly on the eastern slope of the Rockies and Plains. However many a back yard or home orchard tree in Eastern Colorado has on occasion borne lovely crops of this fruit. Western Slope districts are of course nationally famous for Peaches and other more tender tree fruits.

✓ **ELBERTA.** The greatest commercial peach on the market today. Fruit large, yellow with red check, juicy and highly flavored. Sept.

✓ **HALEHAVEN.** Highly popular recent introduction. Produces firm large fruit, yellow with generous red shading. Excellent flavor.

✓ **POLLY.** White freestone having more cold resistance than the average variety. Has luscious flavor, juicy but firm. Late August.

Peach prices, alike or assorted

		Prices each in lots of	
Caliper Inch	Appt. Ht.	1-4	5-15
11/16-1 5 ft. up	2.00	1.95

Sapa Cherry-Plum

✓ **LOMBARD.** Medium large variety of dark violet red color, favored my many. Has yellow juicy flesh of mild delicious flavor. Prolific bearer. Late August. Size 2, 3, 4.

✓ **STANLEY PRUNE.** We recommend it as the top prune, particularly in Section III. Under observation for over ten years, we find it has shown no ordinary winter killing. Bears young, frequently in three years, sets heavy crop just about as regularly as apples. Fruit is large deep bluish purple, firm and sweet, excellent quality fresh or canned. Size 2, 3, 4.

Choice of varieties described above, alike or assorted

		Price each in lots of	
Size	Caliper	Appt. Ht.	1-4 5-15

Plums

American Type

✓ **KAHINTA.** This is an outstanding plum on account of its very large fruit. Color is red; good flavor. Trees thrifty. Size 1, 2, 3, 4.

✓ **SAPA CHERRY-PLUM.** One of the most widely planted hardy tree fruits in the Northern Plains. Fruit size large for its type; purple red thin skin, wine red flesh. Excellent flavor; also fine for jellies and jam. Bears very young. Size 2, 3, 4.

✓ **SUPERIOR.** Plum of very large size. Color red with yellow flesh; fine pleasing flavor. Tree vigorous, productive. Size 1, 2, 3, 4.

✓ **WANETA.** August fruit very large, deep bright-red thin skin; delicious flavor. Size 2, 3.

European Type

✓ **IMPERIAL GAGE.** Very gratifying in rich mild delicious sweet flavor. Medium to large. August. Size 3, 4.

SMALL FRUITS

We wish to call your attention to the usefulness of Small Fruits in the garden. In addition to their unequalled value as delightfully flavored sauce, jellies, and preserves, their usefulness as ornamental vines and shrubs should not be overlooked in planning the home garden. Even Strawberries make a useful and attractive low-growing border around perennial and flower beds.

Grapes

Fredonia

Plump clusters of grapes ripened on your own vines taste twice as good. Double value is often gained for vine covering of fences, arbors, and trellises.

- **BETA.** Where a rugged grape is required, this deserves very serious consideration. A cross between Concord and wild grape will adequately support the home needs for jelly and juices. Hardy without protection. Ideal for arbors and fences.
- **CACO.** A new red grape among the earlier ripening varieties. Bunches are compact and of good size and form. Pleasant sweet flavor.
- **CONCORD.** The widely planted blue-black grape.
- **FREDONIA.** A new very early delicious black grape, with large berries and bunches. Ripens two-weeks ahead of Concord.
- **NIAGARA.** Productive "white" variety. Large berries mature to light greenish-yellow; has sweet mellow flavor.

All vines are heavily rooted 2-year No. 1 size

Pixwell	1.00	2.75	8.50

Winter Hardy Strawberries

Two decades of breeding, selecting and testing with thousands of Wild Rocky Mountain plants crossed with the better commercial strains by USDA Horticulture Field Station at Cheyenne has unveiled a completely new strain of strawberries. This breeding in addition to capturing the incomparable hardiness of the native plant has also transferred the delightful flavor and aroma from the wild strawberries retaining the fruit size of the commercial strains.

SIOUX. Most recent of the **June bearing Cheyenne introductions.** Has been enthusiastically received in the northern plains region by virtue of exceeding vigor, yield and flavor. Fruit is large, bright red, and sweet.

Price per 25, \$1.25; per 50; \$2.25; per 100, \$4.00, per 200, \$7.50; per 300, \$10.00.

Radiance Cheyenne Everbearer

Raspberries

BLACK CUMBERLAND. The largest and very best blackcap. Vigorous growth and prolific. Winter covering advised on Eastern Slope and plains. One year plants only.

INDIAN SUMMER — Everbearing. A popular new red raspberry that fruits in early summer on old canes if protected over winter, and again later in the season on the new canes. Berries larger than St. Regis, but mature late.

ST. REGIS—Everbearing. A good standard variety for years bearing delicious medium to large red berries on canes carried over winter and continuing till fall on new canes. Matures fall crop earlier than Indian Summer; recommended where season is shorter.

NEWBURG. Outstanding variety ripening a few days ahead of Latham; disease resistant. Berries very large, bright red, and do not crumble; heavy bearer. This has the largest fruit of any red raspberry we have ever grown. Winter covering advised on Eastern Slope and plains.

Post Paid	Per 12	Per 25	Per 100
Black Cumberland	\$.1.75	\$3.25	\$12.00
Indian Summer ...	2.75	5.25	20.00

NEW CHEYENNE EVERBEARER

RADIANCE USDA No. 4931. 1954 introduction. The first everbearing strawberry of the Cheyenne series. The hardiest everbearer ever tested in the high plains—delicious flavor and aroma inherited from its native parentage—size and appearance appealing—a brilliant future assured. Produces abundance of medium to large conical rich red berries with red flesh, highly gratifying flavor and aroma; sustained production, June til frost.

Orders limited to 50 plants to a customer as long as stock is available. Price per 25, \$2.75; per 50, \$5.00. Post paid.

EVERMORE. Minnesota everbearing introduction producing large berries of rich red color and pleasing flavor. Above the average in winter hardiness.

Priced per 25, \$1.40; per 50, \$2.50; per 100, \$4.50; per 200, \$8.00.

Garden Roots

ASPARAGUS.

Mary Washington, the leading rust-resistant variety. 2 yr. No. 1 plants. Post Paid. Per 12, \$.90; Per 25, \$1.50; Per 100, \$5.00.

HORSERADISH.

Plant a few crowns and grow your own. Large crowns. Post Paid. 3 for \$.65; per 12, \$2.00.

Mary Washington

RHUBARB

VICTORIA. Medium size, very tender stalks. Large roots.

McDONALD. New Improved Rhubarb.

A new red-stalked variety, beautifully colored. Medium sized stalks, very tender. Unexcelled for pie, cooking or canning. Large roots.

Post Paid	Ea.	Per 3	Per 12
Victor	\$.40	\$1.00	\$3.00
McDonald90	2.60	9.00

ORNAMENTALS for BEAUTY

Practically every family has pride in the appearance of the home grounds. Selection of trees, shrubs, evergreens, vines and flowering plants that are adapted and their use in an orderly manner makes it possible for practically everyone to have the pleasure of homes with attractive surroundings.

Whether it be additions to the home landscape by degrees or complete plantings, there is no investment that can be made in home improvement that is as reasonable in proportion. Structural improvements and home furnishing of course are essential, but the investment for landscaping is the only one in which the per dollar value will increase instead of depreciate.

Shrubs For Flowers and Foliage

The planting sizes of the different varieties listed here are described by height. We wish to stress the fact that height is being given for stock that has been transplanted one or more times and has a heavy, well developed root system and well branched top. This stock should not be confused with light grades of easily propagated stock that is often featured by mail at low prices.

Numbers following names represent approximate height at maturity under average normal conditions.

ALMOND, Double Pink Flowering. 5-6 ft. Branches thickly studded with double pink roses-like blossoms in spring before leaves appear. Does best in protected location. 2 to 3 ft. each \$1.50.

BARBERRY. Mentorensis. 4-5 ft. Semi-evergreen upright shrub carrying heavy thick, dark green foliage changing with frost to pleasing autumn shades. Leaves continue to adhere nearly all winter. Gives air of refined simplicity and beauty to a planting. 18-24 in. each \$1.85.

BARBERRY, Thunbergi. 4 ft. Dwarf shrub used extensively in foundation planting, groups and hedges. Full branching habits; rich green foliage turning red in autumn; red berries. 18-24 ft. ea. \$1.25.

BARBERRY, Red Leaf. 4 ft. The same as Barberry Thunbergi except for colorful bronzy red foliage all summer long. Locate in sunlight for best color. 18-24 in. each \$1.50.

Butterfly Bush

BUTTERFLY BUSH "DUBONNET"

Summer Lilac. 4-6 ft. A new dark wine dubonnet colored Buddleia with firm, large, spikes and individual flowers of good size. Blooms from July on. Perennial shrub. Will bloom first year. Strong plants each 95c.

BUTTERFLY BUSH, Buddleia

Empire Blue ea. 1.15
Royal Red ea. 1.15
White Bouquet ea. 1.15

CARAGANA, Arborescens, "Siberian Pea Tree." 10-12 ft. Very hardy tall shrub for specimens, screens or hedges; attractive locust like foliage, green stems. Small yellow pea-shaped blooms May-June. 18-24 in. 75c; 2-3 ft. \$1.00 3-4 ft. each \$1.50.

(For hedging grades, see Hedge plants)

CARYOPTERIS (Blue Mist Spirea) 20-30 in. A real contribution to the meager list of late flowering shrubs. Covered with small powder-blue fringed flowers in numerous clusters, on a round mound-like plant from August until frost. Very hardy. 15-18 in. each \$1.25.

CARYOPTERIS MONGOLICA. Also referred to as "Sage Orchid" 20-30 in. Dwarf very hardy shrub with gray-green foliage surmounted by qualities of orchid-like flowers of fascinating powderblue in racemes up to a foot in length. Blooms in July and Aug; lasts well as cut flowers. Blooms first year. 3 year plants each \$1.25.

COTONEASTER, Acutifolia. 6 ft. Very hardy shrub assuming shapely proportion. Foliage rich dark green, glossy on upper side, medium size, fairly dense. Beautiful autumn color; profusion of blue-black berries in fall. Sun or shade. 2-3 ft. ea.; \$1.50; 3-4 ft. each \$1.95.

CURRENT, Alpine. 4 - 5 ft. Hardy dwarf bright green foliage shrub developing neat compact shape. Adapted for shade, also sun. 15-18 in. \$1.35; 18-24 in. \$1.75.

DOGWOOD, Red Stem. (Cornus stolonifera COLORADENSIS). 5 to 7 ft. The choice of shrub Dogwoods. Fine display of medium to large foliage; white flower clusters late May followed by white berries. Bright red branches liven the winter landscape. 18-24 in. \$1.25; 2-3 ft. \$1.65; 3-4 ft. \$1.95.

DOGWOOD, Yellow Stem (Corus Go'den Twig.) 6-8 ft. A striking yellow-branched form of Dogwood. Its distinct yellow bark has fine winter effect. 2-3 ft. each \$1.50.

EUONYMUS, Europaeus, European Euonymus. (10-12 ft.) A large dark green foliated shrub with light yellow bloom followed by rose-colored berries. Foliage turns a beautiful scarlet in fall. 2-3 ft. ea. \$1.65.

FLOWERING QUINCE. Cydonia japonica. 5-6 ft. A selected strain, beautiful uniform scarlet flowers. Bush becomes blaze of color in spring before leaves mature. Blooms best following mild winter and spring in protected place. 2 to 3 ft., each \$1.35.

FORSYTHIA, Fortunei. Golden Bells. 6-8 ft. Upright arching branches bearing many early bright yellow flowers in April. Blossoms best following mild winter and spring in protected places. 2 to 3 ft., each \$1.35.

Hydrangea, A.G.

HYDRANGAEA, A G. 3-5 ft. Large clusters, snow-white flowers, July- Aug.; large foliage. Usually starts from ground each spring in this climate. Not recommended in strongly alkaline soils. 3 year plants, each \$1.35.

HANSEN BUSH CHERRY. See following cherry trees in fruit section.

HONEYSUCKLE, Zabeli, True Red Honeysuckle. 8-10 ft. An improved honeysuckle with decided rose-crimson blossoms, which is in contrast with the pink shades of other honeysuckles. Blooms May-June followed by scarlet berries; very hardy.
2-3 ft. \$1.40; 3-4 ft. \$1.75.

Zabeli Honeysuckle

MOCKORANGE, Virginal. 6-8 ft. Medium grower, bearing many beautiful fragrant semi-double flowers over a long season from May on.

2-3 ft. \$1.50; 3-4 ft. \$2.00 4-5 ft. \$2.75.

NINEBARK, Dwarf. 4-5 ft. A medium low growing shrub giving a fine trim appearance; compact form; dense attractive green foliage. Neat white flower clusters, early June.

3-4 ft. ea. \$1.65.

POTENTILLA Farreri. 3 ft. up. Also referred to as P. Goldrop. A new shrub that is a "find" among dwarf varieties. Trimly shaped bushes have fairly dense green finely divided foliage which is surmounted by a generous profusion of small bright golden yellow blossoms in June, continuing throughout the summer. Hardy; sun or shade.

9-12 in. ea. 95c; 12-18 in. ea. \$1.50; 18-24 in. ea. \$1.95; 2-3 ft. \$2.50.

PRIVET, Amur River. Chiefly used for trimmed hedges. Is satisfactory up to about 5,000 ft. See hedge plants.

➤ **PRUNUS CISTENA. Purple Leaf Plum.** 5-7 ft. Very colorful shrub. Plum like foliage is deep blood red while forming changing to bronzy green; small pink flowers in May. Adds variety and contrast.

18-24 in. ea. \$1.50; 2-3 ft. ea. \$1.75; 3-4 ft. ea. \$2.25.

➤ **PRUNUS NEWPORT.** 10-12 ft. Can be grown as small tree or large shrub, growing taller than P. Cistena. Foliage carries a rich cast of reddish purple throughout the season.

2-3 ft. ea. \$1.85; 4-5 ft. ea. \$2.95.

➤ **PRUNUS TOMENTOSA, Nanking Cherry.** 8 to 10 ft. Very desirable shrub heavily laden with light pink bloom before leaves develop. Bears red cherry-like fruit of fair size and good flavor often used for preserving. Neat branching habit and well furnished with dark green foliage.

3 to 4 ft. each \$1.50.

PRUNUS TRILOBA. Also known as Flowering Almond, Flowering Plum, and "Rose Tree of China." 5-7 ft. Can be grown as charming shrub or dwarf ornamental tree. In spring the whole bush is decked with quantities of very double pink blossoms just as the leaves begin to appear. Foliage also attractive. 18-24 in. \$1.50; 2-3 ft. ea. \$1.90.

3-4 ft. ea. \$2.50.

SNOWBALL, Common. 8-10 ft. Well known shrub forming many balls of pure white flowers in May-June.

2-3 ft. ea. \$1.75.

SNOWBERRY, Red (Coralberry.) 4-5 ft.

Attractive variation from the white Snowberry in that it has smaller red berries that cluster in ropes along the stems and with slightly darker foliage.

18-24 in. ea. 90c; 2-3 ft. ea. \$1.10; 3-4 ft. ea. \$1.45.

SNOWBERRY, White (Racemousus.)

4-5 ft. Of fairly compact growth; attractive green foliage. Tiny pink flowers in June followed by large white berries remaining into winter.

2-3 ft. ea. \$1.00; 3-4 ft. ea. \$1.35.

SPIREA Frobeli. 3 to 4 ft. A summer blooming dwarf spirea with crimson pink flower clusters.

3 yr. clumps \$1.15.

SPIREA Van Houtte. 5-6 ft. Well known popular shrub, sometimes called "Bridal Wreath." Graceful habit of growth. A "fountain" of white flowers in late May.

18-24 in. ea. 90c; 2-3 ft. ea. \$1.10; 3-4 ft. ea. \$1.35.

SUMAC, Candensis-Dwarf. 5-6 ft. Fragrant Sumac. Small yellow flowers in April followed by red berries. Colorful red foliage in autumn.

2-3 ft. ea. \$1.50.

SUMAC, Staghorn. 15-18 ft. A large shrub or tree; colorful red foliage and scarlet fruit clusters in autumn.

3-4 ft. ea. \$1.35.

SUMMER PLANTING

We offer throughout the summer nearly a complete selection of the Ornamental shrubs established in containers making possible the selection and successful planting of growing shrubs, in full leaf and possible bloom, at your convenience anytime during the summer and fall season. (More information page 13.)

TAMARIX Hispida. 10-15 ft. One of the hardiest and best Tamarix; has feathery silvery foliage; bright coral-pink flowers. June-July. (For best success, Tamarix should be cut back at least half when planting.)

2 to 3 ft. ea. \$1.35.

VIBURNUM Lantana. "Wayfaring Tree."

8-10 ft. Upright growing shrub with heavily veined rich green foliage. Heads of white flowers in June, followed by red and black berries.

2-3 ft. ea. \$1.75.

Viburnum Lantana

LILAC SYRINGA

This class of shrubs is of great value for Western planting; they are hardy, drouth-resistant, and unexcelled during their blooming season for beauty.

COMMON PURPLE LILAC. 8-10 ft.

The fine old familiar lavender-purple. 18-24 in. ea. \$1.10; 2-3 ft. ea. \$1.35.

PERSIAN LILAC. Rothmanogensis type.

8-10 ft. Flowers few days later than Common Lilac; color attractive lilac shade, rosy overcast. Medium size foliage and graceful habit of growth. Starts blooming young. One of the most satisfactory lilacs.

2-3 ft. ea. \$1.50; 3-4 ft. ea. \$1.85; 4-5 ft. ea. \$2.50.

FRENCH HYBRID LILACS

The Hybrid strains have added much in variety of color to the popular Lilac. Bushes similar to the Common Lilac but with decided difference and variation in color of bloom. All priced as follows:

Size	Height	Each
No. 1	2 to 3 ft.	\$2.40
No. 2	18 to 24 in.	1.75

BELLE de NANCY. Double satiny-rose. Size 1.

LUDWIG SPAETH. Single massive trusses of deep purplish-red. Size 1, 2.

MICHEL BUCHNER. Exquisite pink-lilac buds merging into blue-lilac when fully open. Large trusses. Size 1.

MME. LEMOINE. Large double white very profuse bloomer. Size 1.

PRES. GREVY. Double, clean soft delicate blue color. Size 1.

SHADE and ORNAMENTAL TREES

Both beauty and comfort are gained by planting trees. In the following list are outstanding varieties for background and framing, for shade, specimens and screens.

The numerals following the name is approximate height at maturity in feet.

ASH, Green Ash. 40 to 50 ft.* One of the most popular shade tree in dry, cold climate. Makes a round headed tree with attractive green foliage.
8-10 ft. ea. \$3.75; 1¼-1½ in. cal. \$5.25; 1½-2 in. cal. \$7.00.

BIRCH, Cut Leaved Weeping. 30 to 40 ft. A very graceful and attractive tree with drooping limbs and delicately cut foliage; silvery white bark. Well branched trees.

6-7 ft. ea. \$5.25; 8-9 ft. ea. \$6.75.

ELM, Chinese. 40 to 50 ft. Also known as Siberian Elm. An extremely rapid grower, with slender, almost wiry branches carrying its dense graceful foliage over a long season.

The remarkable growth of Chinese Elm with limited moisture, together with its attractiveness have made it a favorite in the Great Plains region. Planting is not advised where moisture is excessive, or at higher elevations where growing season is short.

Prices apply to transplanted, correctly shaped trees.

Price Each Per 10

1½ to 2	inch calper	... 4.75	45.00
2	to 2½ inch caliper	... 6.25	60.00
2½ to 3	inch caliper	... 7.50	
3	to 3½ inch caliper	... 10.00	

Alternate sizes available. Inquire at Nursery.

Special Windbreak stock not transplanted.

5-6 ft. each 85c; per 10, \$7.50; per 100, \$65.00.

ELM American, 40-60 ft. A noble popular American tree for street and general plantings.

1¼-1½ in. Cal. \$5.50.

1½-2 in. Cal. \$7.50.

HACKBERRY. 40 to 50 ft. Habit of growth is very similar to American Elm. Branches are strong and wiry; tree is remarkably free from insects and disease. A very durable and sturdy shade tree.

6-8 ft. \$4.25; 1¼-1½ in cal. \$7.00.

HONEYLOCUST, Thornless. 50 ft. We

recommend this as possibly the outstanding tree for general planting in the west central plains. Grows in most western soils; rather drought resistant, and above average in freedom from insect pests and diseases. Has attractive pinnate or fernlike foliage and branches are not subject to snow breakage. Rate of growth moderate; does not sucker. Selected thornless strain.

8-10 ft. \$6.25; 1¼-1½ in. Cal. \$8.00;

1½-2 in. Cal. \$9.75; 2-2½ in. Cal. \$12.00.

We offer for summer plantings a fair selection of shade trees established in containers. Inquire at Nursery during summer and fall.

Honeylocust

Alternate shade tree varieties and sizes available. Inquire at Nursery.

LINDEN, American. 50 ft. A pleasing tree that could well be planted more extensively in many localities. Of moderate growth, rounded to pyramidal in shape; large heart-shaped leaves; fragrant blossoms.

5-6 ft. ea. \$2.50; 6-8 ft. ea. \$4.50.

MAPLE, Soft or Silver. 60 to 80 ft. The well known rapid growing variety; foliage light colored on underside.

6-8 ft. ea. \$3.25; 1½-2 in. cal. \$7.00; 2-2½ in. cal. \$8.50.

MAPLE, Schwedler, Purple or Red Leaf

Maple. 40-50 ft. One of the most attractive Maples in cultivation. As the broad leaves unfold and develop in the spring, the tree is a mass of reddish purple foliage maturing to a dark bronzy green.

7 to 8 ft. whips, each \$4.50.

MORAINÉ LOCUST, (Pat. 836) 60 to

80 ft. A new completely thornless, podless improved Honeylocust with round head when young but tall and vase-shaped when older.

6 to 7 ft. whips, each \$6.00.

MOUNTAIN ASH, European. 20-30 ft.

Nicely proportioned ornamental tree with rich green fern-like foliage; bears clusters of white blossoms in late spring succeeded by highly ornamental orange-red berries in fall.

6-8 ft. ea. \$4.50; 8-10 ft. ea. \$5.75.

POPLAR, Lombardy. 50-60 ft. Very rapid, narrow spire-like growth.

Branches grow upright close to trunk; leaves green with broad, solid outline. Used for tall screens—formal planting.

6-8 ft. ea. \$1.50; 8-10 ft. ea. \$2.00; 1¼-1½ in. cal. \$2.75; 1½-2 in. cal. \$3.25; 2-2½ in. cal. \$4.25.

POPLAR, Sargenti. Cottonless Cotton-

wood. 50 to 60 ft. This is the regular Western Broadleaf Cottonwood that has been propagated from infertile trees and will not bear cotton; noted for hardness.

6-8 ft. ea. \$2.75; 8-10 ft. ea. \$3.50; 1¼-1½ in. cal. \$4.50; 1½-2 in. cal. \$6.00.

RUSSIAN OLIVE. 20 to 25 ft. One of the hardier trees. Has narrow silvery foliage and stems; small very fragrant blossoms. Fine for specimens, screens and hedges.

6-8 ft. ea. \$3.25; 8-10 ft. ea. \$4.00.

WILLOW, Niobe Weeping. 30-40 ft. Has

very attractive golden bark and long, pendulous branches; beautiful in summer and of striking winter appearance.

8-10 ft. ea. \$3.00; 1¼-1½ in. cal. \$4.25; 1½-2 in. cal. \$5.25; 2-2½ in. cal. \$6.50.

WILLOW, Russian Golden. 25-30 ft.

Medium spreading growth. Golden-yellow bark, very hardy. Heavily branched stock.

6-8 ft. ea. \$2.00; 8-10 ft. ea. \$2.75.

FLOWERING CRABS

Flowering Crabs are becoming very popular as medium size ornamental trees. Their gorgeous blooming season is awaited with anticipation each year.

CRAB, Bechtels, 12-15 ft. A dwarf crab bearing many rose-like large double pink flowers in May. A standard of excellence in flowering crabs.

2-3 ft. ea. \$1.85; 3-4 ft. ea. \$2.75.

✓ **CRAB, Dolgo.** 20 ft. A first rate hardy ornamental as well as bearing very useful fruit for jells. White flowers followed by highly colored small crimson apples.

5-6 ft. ea. \$2.25; 6-8 ft. ea. \$3.00.

✓ **CRAB, Hopa (Red Flowering Crab)** 20-25 ft. Striking rosy-red flowers followed by bright red fruit; foliage has soft bronzy tinge. A choice hardy variety.

4-5 ft. ea. \$2.25; 5-6 ft. ea. \$3.25; 6-8 ft. ea. \$4.00.

✓ **CRAB, Red Silver.** 18-20 ft. Has dull maroon foliage with delicate silver shading with somewhat cut leaf shape. Flower buds are rich red in color, remaining definite red in color when expanded. Small dark red fruits.

3-4 ft. ea. \$2.25; 4-5 ft. ea. \$3.00; 5-6 ft. ea. \$3.75.

Hedging and Windbreak Plants

The following varieties of trees and shrubs are some of the most satisfactory for trimmed hedges, informal hedges, screens borders, and windbreaks. We briefly point out possible recommended uses of the varieties listed below.

Trimmed hedges have plants spaced from 6 to 12 inches or more apart with 9 to 12 inches being most common. Hedging stock should be trimmed back severely ($\frac{1}{2}$ or more) when planted to induce thick growth at the bottom. For screen or borders, plants are usually spaced from 18 inches to several feet apart, depending on the variety and the effect desired.

Curved Privet Hedge

Wind breaks consist of one or several rows. Where several rows are used, the lower growing variety is placed on the outside, or windward side. Caragana, for example, and graduating with a taller variety such as Russian Olive, and still a taller variety on the inside, such as Chinese Elm. For average conditions, and especially on dry land, Chinese Elm from 6 to 12 ft. apart, Russian Olive from 5 to 10 ft. apart, and Caragana, from 3 to 5 ft. apart are the outstanding varieties.

Further description of the following varieties is noted in listing of large landscape sizes under trees and shrubs.

BARBERRY, Thunbergi. Low trimmed hedges or informal hedge. Not so successful at higher altitudes or in strongly alkaline soils.

CARAGANA. Trimmed hedge 2½ to 5 ft. Screens, border or windbreak.

CHINESE ELM. The use of Chinese Elm for windbreaks has exceeded that of any other deciduous variety in the plains area the past 15 years or more because of rapid growth, drought resistance and thick branching habit. Also used for quick growing trimmed hedges of 4 to 7 ft. (Also see special windbreak stock page 10.)

COTONEASTER, Acutifolia. Very hardy dense glossy green trimmed hedges 2-4 ft. Very good for screens.

HONEYSUCKLE, Zabeli. Trimmed hedge 3 to 5 ft.; also border or screen. Fast growing; hardy.

PRIVET, Amur River. Trimmed hedge, 2 to 4 ft.

PRIVET, Swedish. Trimmed hedge 2 to 4 ft. A finer branched and leafed variety.

RUSSIAN OLIVE. Windbreak; trimmed hedge 4 to 6 ft.; tall screen or border.

SPIREA VAN HOUTTE. Informal hedge; screen or border.

PRICES OF HEDGES AND WINDBREAK PLANTS

Hedge material is smaller, lighter stock than that listed under Trees and Shrubs.

	Per 25	Per 100

Climbing Vines

CLEMATIS. One of the most beautiful 10 to 12 ft. vines grown. Very popular due to their beautiful large purple, red, blue, or white flowers in July.

CLEMATIS JACKMANI. Most popular and vigorous Clematis opening flowers from 4 to 6 inches across; rich velvety purple. Each \$1.35, post paid.

CLEMATIS ANDRE—Bright velvety red\$1.35

CLEMATIS HENRYI—Large creamy white 1.35

CLEMATIS RAMONA—Large light blue 1.35
Post Paid

ENGLEMAN IVY. 30 to 40 ft. Neat, hardy self-climber on brick or stone walls; brilliant autumn colors. Rapid growing, very hardy and dependable.

GRAPE Beta. The most dependable hardy grape for covering arbors and fences.

HONEYSUCKLE, Scarlet Trumpet. 15 to 20 ft. Desirable vine with red tubular flowers over rather long period during summer. Has rich dark foliage remaining late in fall.

SILVER LACE VINE. 20 to 25 ft. Very rapid growing vine with fresh green foliage decorated with clouds of fragrant, foamy white flowers from July on.

CLIMBING ROSES are an ever popular subject for trellises. Our climbing roses are listed under "Climbing Roses."

CONTAINER-ESTABLISHED MATERIAL

This method of handling Nursery stock is being introduced into the Plains Region by virtue of its gratifying success in neighboring areas. Not only offering the home owner an opportunity of make successful planting throughout the summer, container - established materials also provide personal selection of incidental items or the selection of a complete landscape planting from stock growing in full leaf or bloom. Successful planting experiences of the past seasons has prompted us to extend our offering to include most of the varieties of shrubs, Evergreen, Vines, Roses, Mums, Perennials, and a few fruit and shade trees described in this catalog, as long as contemplated requirements last. Available June, Thru Oct.

Soil used in establishing our stock is specially prepared and carefully formulated to provide ample humus and fertility to insure healthy growth. With simple planting requirements, as illustrated below, and reasonable growing conditions, successful continued growth without wilt or loss of bloom may be expected.

FIBER CONTAINERS ARE EASILY REMOVED BY SPLITTING SIDES WITH POCKET KNIFE. METAL CONTAINERS ARE SPLIT DOWN TWO SIDES BEFORE LEAVING NURSERY.

METAL CONTAINERS ARE REMOVED BY LOOSENING SIDES & BENDING AWAY FROM ROOT BALL. REMOVE PLANT BY LIFTING BALL WITHOUT BREAKING UP SOIL.

1. DIG & TEST HOLE SIZE & DEPTH BEFORE REMOVING CONTAINER. BE SURE GRAFT ON ROSES IS LOCATED ABOUT 2" BELOW SURFACE

2. REMOVE CONTAINER CAREFULLY & SET PLANT IN HOLE.

3. FILL AROUND BALL WITH GOOD SOIL GENTLY & FIRMLY PACKED.

4. LEAVE SOME SPACE TO HOLD WATER & SOAK THOROUGHLY.

5. AFTER WATER SEEPS AWAY, FINISH FILLING WITH SOIL.

CAUTION: DO NOT BREAK OR CRUMBLE SOIL ROOT BALL!

EVERGREENS

PLANT EVERGREENS FOR SUMMER BEAUTY AND WINTER COLOR

Most important of all is the warm, green cheerfulness of varied foliage textures in the winter landscape when other ornamentals are without foliage or flowers. Summer and winter, Evergreens give an air of friendliness and distinction to any planting.

Careful skill is devoted to digging our Evergreens with an ample ball of earth to give assurance of continued successful growth.

Upright Junipers

These are the pyramidal Evergreens very frequently planted close to buildings, along with low evergreens and shrubs. The outline and height can be influenced by shearing.

The following distinct and beautiful named varieties each has originated from outstanding specimen parent tree selected from among thousands and grafted from the original parent stock. These grafted trees then have characteristics indetical with the parent tree and with each others. Thus it is possible to have exactly matched trees in growth and appearance either in pairs or any multiple. All varieties below are of Juniper Scopulorum specie. The illustration of Moffetti Juniper is typical of J. Scopulorum growth habit.

Juniper Moffetti

SCOPULORUM JUNIPER or Colorado

Silver Juniper. This is the hardy western upright variety. Growth conical and densely branched; foliage of pleasing and varying texture and color. Being seedlings, there is a varaiation in color from green to greenish-silver from tree to tree making it very difficult to match pairs. Seedlings are just as desirable and useful as the Grafted varieties if matched growth characteristics are not an important factor. In ordering, give preference in color; Green — Greenish blue — Greenish silver.

2-2 1/2 ft. each	\$ 7.75
2 1/2-3 ft. each	\$ 9.25
3-3 1/2 ft. each	11.25
3 1/2-4 ft. each	13.25
4-4 1/2 ft. each	15.00

UPRIGHT PFITZER JUNIPER. A useful version of the very popular Pfitzer Juniper trained upright. Its irregular growth is desirable where a somewhat boarder and less formal evergreen of limited height is needed.

3-3 1/2 ft each	\$15.00
-----------------	---------

Alternate Upright Juniper varieties and sizes available. Inquire at Nursery.

Grafted Junipers

DEWDROP Scopulorum Juniper. Named Dewdrop due to its natural drop shaped growth. Color green to greenish-silver. Size 3, 4.

GAREEI GREEN Scopulorum Juniper. A somewhat dwarfer type grows slower with dense dark green foliage. Size 2, 3, 4.

HALL'S SPORT Scopulorum Juniper. A very slow growing, tightly branched greenish silver in color. Needs little or no trimming. Size 4, 5.

MOFFETTI Scopulorum Juniper. One of the best. Upright pyramidal habit of growth; compact and shapely with very little trimming. Attractive greenish-silver color. Size 1, 2, 3.

SUTHERLAND Scopulorum Juniper. Has a natural full-bodied habit of growth; compact with very little trimming. Medium to dark green in color. Size 1, 2, 3, 4, 5.

GRAFTED JUNIPERS		Priced Each
Size 1	4-4 1/2 ft.	\$17.50
Size 2	3 1/2-4 ft.	15.00
Size 3	3-3 1/2 ft.	13.00
Size 4	2 1/2-3 ft.	11.00
Size 5	2-2 1/2 ft.	9.00

Low Growing Junipers

For Foundations and Border Planting

As indicated, spreading Junipers are now available, balled and burlapped (B & B) as well as being established in containers with ample root space for spring planting. Stock in containers can also be successfully transplanted beyond the spring season into the summer and fall months.

(Low growing evergreens are measured by the average diameter of their spread.)

PFITZER JUNIPER. A low spreading Juniper, one of the best; foliage attractive blue-green or soft mossy appearance. Note picture back cover. Established in containers or B & B.

18 to 24 in. \$8.25; 2 to 2½ ft. \$10.00;
2½ to 3 ft. \$12.50; 3 to 3½ ft. \$15.00.

TAMARISCIFOLIA JUNIPER. Dwarf low growing Juniper that ranks as one of the neatest, most attractive in cultivation. A green color that is softened by a blue tone in a densely patterned growth. Little change in color, summer to winter. Also has possibilities for "planter box" planting. Note picture back cover. Established containers or B & B.

15 to 18 in. \$7.75; 18 to 24 in. \$9.00.
2 to 2½ ft. \$11.00.

Sabina Juniper

SABINA JUNIPER. Low growing type with numerous upright fan - shaped branches, with tufted dark green foliage. 18 to 24 in. each \$8.00; 2 to 2½ ft. \$9.75; 2½ to 3 ft. \$12.00.

Alternate sizes and varieties available. Inquire at Nursery.

A summer photo of our Sales Yard. Some of our larger Container-established Spreading Evergreens as well as Baby Evergreens are in the foreground followed by two frames of potted roses with bloom, and in the background are a few of the Upright Evergreens in containers. (Further information on Container-established materials on page 13.)

Baby Evergreens

These are the same varieties as described, three times transplanted, well-rooted and branched. If immediate effect is not too important they may be quite useful in foundation plantings, informal Evergreen hedges and borders or groups. All established in containers. Add 25c each for crating on all express shipments.

COLORADO SPRUCE (Green Type).
Well branched 12-18 in. tall.

PONDEROSA PINE. Average 18 in. tall, branched and nicely started.

PFITZER JUNIPER. Nice plants 12" or more spread.

TAMARISCIFOLIA. Well shaped plants about 12" spread.

Priced alike

Each	Per 3	Per 10	Per 25
\$2.50	\$7.00	\$22.50	\$55.00

GRAFTED UPRIGHT JUNIPERS. Sutherland, greenish-blue; Welchi, greenish silver; Cannarti, green. Av. 15 in. tall. Each \$3.75; Per 3, \$10.50.

Pines

Austrian Pine

AUSTRIAN PINE. Pine tree of standard growth habit, carrying better shape, density and color than average taller growing varieties. Long rich green needles. Inquire at Nursery regarding available sizes.

PONDEROSA. (Bull or Western Yellow Pine.) A native pine with long glaucous needles. Develops into beautiful pyramidal tree. Stands almost unlimited drought. Grows about 12 inches a year. Ultimate height 50 to 60 ft. See Baby Exergreens.

PINON PINE. A slow-growing choice variety. Low round-headed tree, branching from ground. Short foliage of rich warm green, produces delicious edible nuts. Make beautiful specimen trees or ideal tall informal evergreen screens.

2½-3 ft. \$9.50; 3-3½ ft. \$11.25;
3½-4 ft. \$13.25; 4-4½ ft. \$15.00;
4½-5 ft. \$16.75; 5-6 ft. \$18.50.

LOW-GROWING PINE

MUGHO PINE. The popular low-growing compact pine that fits in so well in foundation plantings, as specimens or in groups.

18 to 24 in. \$9.00; 2 to 2½ ft. \$11.00.

Spruce

COLORADO BLUE SPRUCE. This is one of the choicest and most beautiful of all evergreens with its symmetrical pyramidal form and color. It is exceptionally well adapted for wide range of planting and is one of the hardiest. Note picture, back cover.

There is a natural color variation of trees of this specie even in seedlings from the same parent tree, and these we classify as Select Blue, Average Blue, and Green color types. Aside from color there is no difference: in groups, the contrast between the blues and greens make pleasing combinations. Rate of growth 6 to 12 inches or more per year.

SELECT BLUE TYPE: 2 to 2½ ft. ea. \$10.00; 2½ to 3 ft. \$12.50; 3 to 3½ ft. \$15.00; 3½ to 4 ft. \$17.50; 4 to 4½ ft. \$20.00; 4½ to 5 ft. \$22.50; 5 to 5½ ft. \$25.00; 5½ to 6 ft. \$27.50.

AVERAGE BLUE TYPE: 2 to 2½ ft. ea. \$9.00; 2½ to 3 ft. \$11.25; 3 to 3½ ft. \$13.50; 3½ to 4 ft. \$15.75; 4 to 4½ ft. \$18.00; 4½ to 5 ft. \$20.00; 5 to 5½ ft. \$22.50; 5½ to 6 ft. \$24.75.

GREEN TYPE: 2 to 2½ ft. ea. \$8.00; 2½ to 3 ft. \$10.00; 3 to 3½ ft. \$12.00.

(Larger spruce or exceptions to average color or conformation priced according to value upon application or by personal selection. (Special crating if required, charged at cost).)

Alternate size available in some groups. Inquire at Nursery.

Field Photograph

ROSES

Roses in all their beauty and fragrance can be enjoyed in almost any garden. For best success with Everblooming roses, good fertile soil, several hours daily sunshine, and good thrifty planting stock is required. Where soil is poor, it should be replaced with good top soil to a depth of 18 to 24 inches for the rose bed. A six-inch mound of soil or leaves over the crown of the plant is a good means of winter protection. In many localities, climbing roses should be laid down for winter and entirely covered. Hardy Shrub Roses need no protection and are not exacting as to soil.

Our list of roses represents a very careful selection in all colors from a great number of varieties. You will find a number of choice new creations of recent years as well as some of the old favorites that cannot be replaced because of their lasting merits.

Everblooming Roses

Roses Post Paid at EACH rate only.
Finest Western 2 year Top Size Field Grown. Dormant Bushes. Priced each \$1.35; 10 for \$12.50.

YELLOW SHADES

GOLDEN RAPTURE. Long lasting well-shaped buds and double blooms of rich yellow on long stems.

JOANNA HILL. The buds are large, long pointed and open to large full, semi-double attractive flowers of soft yellow with darker center.

McGREDY'S YELLOW. Bright butter-cup yellow flowers of good form and substance. Glossy bronzy leaves, reddish stems.

MRS. PIERRE S. DuPONT. Medium sized long-pointed bud of a reddish gold opening to semi-double cupped lasting flower of deep golden yellow.

SOEUR THERESE. Long pointed buds of chrome-yellow, heavily marked with carmine; open flower of rich daffodil-yellow. Sweet briar fragrance.

PINK SHADES

DAME EDITH HELEN. One of the largest and most perfectly formed pink roses grown; glowing clear pink color on strong stems.

EDITOR McFARLAND. Fine shapely buds opening to double balanced flower; color is solid deep brilliant pink; blossoms freely.

PICTURE. A picture both in form and color. Beautiful buds open into medium size pink blossoms with warm salmon undertone.

PINK DAWN. Deep rose pink lightly toned with salmon-rose. Perfectly formed buds and bloom.

PINK RADIANCE. This is a fine all-around garden rose of brilliant rose-pink; vigorous and prolific; consistent performer.

THE DOCTOR. Large beautiful buds expand to enormous blooms of exquisite silvery pink, with intense rose fragrance.

ROSES—Continued

WHITE SHADES

CALEDONIA. Long buds of ivory change to purest white, flowers open into large double blooms.

K. A. VICTORIA. A popular fragrant white. Bears many large creamy white, perfect blooms.

McGREDY'S IVORY. Fine creamy white fragrant rose that has deep petals of good substance. Pointed buds open to large double blooms.

MME. JULES BOUCHE. Not a mammoth rose, but ideal in form of bud and flowers. A slight flush of pink shows in center of opening buds, the flower maturing to pure white. Fragrant.

SNOWBIRD. Exquisite, small to medium, long, flaring white buds open into showy, many petaled high-center blooms.

BICOLOR and BLENDING

CONDESA de SASTAGO. A new variety with rare attractive color. Bears quantities of double flowers; petals are distinctly two-toned, deep coppery pink on inside and golden yellow outside. Vigorous, bushy.

COUNTESS VANDAL. Very long and graceful buds opening slowly to beautiful high centered flowers to coppery bronze and pink suffused with gold and salmon.

DUQUESA de PENARANDA. A beautiful blend of apricot-orange and dark pink, opening to splendid blooms of coppery apricot.

EDITH NELLIE PERKINS. Buds long and pointed, outside of petals cream and bluish shaded with orange, inside salmon pink, golden orange base.

MME. JOSEPH PERRAUD. High-centered, perfectly formed buds and double blooms that shade from shell-pink at the edges to buff and orange in the center, with long stemmed blooms.

PRES. HERBERT HOOVER. Fragrant flowers. Very charming combination of cerise-pink, flame, scarlet and yellow with pink shade dominant.

TALISMAN. Brilliant red and gold buds, opening to well shaped blooms of glowing yellow stained copper-red and orange-rose on inside petals.

RED SHADES

AMERICAN BEAUTY. Flowers are large and full, deep pink shaded soft carmine. Although not at profuse throughout the season as other roses in the everblooming class, it is more vigorous.

AMQUINARD. Blackish crimson buds, semi-double of dark maroon-red. A popular "black" rose.

CHRISTOPHER STONE. Brilliant sparkling scarlet crimson. Shapely long pointed buds open into large attractive flowers with true old damask rose fragrance.

CRIMSON GLORY. Consistently tops among red roses. Large urn-shaped buds open to fragrant flowers of intense, deep vivid crimson shaded with deeper red, and mellowed with soft velvety nap.

E. G. HILL. One of the finest red roses. Long buds, high centered full double flowers; dazzling scarlet maturing to deeper pure red.

ETOILE de HOLLAND. Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when open; fragrant.

GRENOBLE. Always an attraction in our display garden. Plant is vigorous and blooms come on long stems. Buds are crimson but double, open flower is brilliant red, almost scarlet.

HADLEY. Large, double, well formed flowers of deep rich crimson. Vigorous grower.

McGREDY'S SCARLET. Brilliant scarlet blooms shading to orange-yellow at base of petals, long pointed buds.

POINSETTIA. One of the most brilliant shades in red roses; referred to as Poinsettia-scarlet in color. Has long buds, nicely petaled.

RED RADIANCE. This is the bright rosy-red form of Pink Radiance. Very popular.

ROUGE MALLERIN. Exceptionally fine deep red rose of the most intense coloring with the texture and luster of velvet. Holds its color exceptionally well. Fragrant.

PEACE COLLECTION

The collection will include one PEACE rose, which everyone should grow, and one each of the Red, Yellow, Pink and Bicolor of OUR selection from the fine stock and varieties listed under Everblooming Roses.

\$7.90 catalog value all 5 for \$7.00 P. Pd.

PATENTED EVERBLOOMING ROSES

All varieties listed below are the Hybrid Tea everblooming bush type. Each is offered here for its individual distinction; the majority of these have received American Rose Society Awards (AARS)

BUCCANEER. (Pat.) A brilliant unfading new yellow with particularly lovely, long slender and tapering buds on tall vigorous growing and well foliated plant. **Each \$2.75.**

CAPISTRANO (Pat.) AARS. Rich shade of deep glowing rose pink both in bud and open flower with practically no fading through life of flower. Large buds and blooms and strong stems. Rich heavy lasting fragrance. **Each \$2.25.**

CHARLOTTE ARMSTRONG. (Pat.) AARS. Long slender blood-red to cerise flowers that attract attention in any rose planting. **Each \$2.25.**

CHRYSLER IMPERIAL. (Pat.) 1953 AARS Winner. Long buds, large high-centered flowers of crimson red. Excellent plant and foliage. **Each \$2.75.**

ECLIPSE. (Pat.) Bud long-pointed, deep gold. Flowers yellow. Foliage leathery. Vigorous. **Each \$1.75.**

FORTY-NINER (Pat.) AARS. Brilliant hued bicolor; colors contrast brilliantly, yet combine beautifully. Inside of petals are vivid Orient-red, while outside is Chrome-yellow changing to softer yellow. Long buds. **Each \$2.50.**

FRED HOWARD. (Pat. 1006) 1952 AARS Winner. A yellow rose with about 4-inch blooms when fully open and is well filled with 50 or more petals. The ovid buds are golden yellow tinted light red, as they open they become rich buff-yellow with pinkish shading. Slightly fragrant. **Each \$2.50.**

HEARTS DESIRE (Pat.) Long unfurling petals of pure even shade of luminous red, holding color and shape remarkably well. Exceptionally fragrant; plants vigorous and prolific. **Each \$1.75.**

HELEN TRAUBEL. (Pat. 1028) 1952 AARS Winner. The color varies somewhat with the weather from a light sparkling pink to luminous apricot. Its unusual large, long slender buds are magnificent, opening into 4 to 5 inch pleasingly fragrant blossom. Vigorous, robust plants. **Each \$2.75.**

LOWELL THOMAS (Pat.) AARS. Large long pointed buds open to large double high centered lasting blooms of clear canary yellow. **Each \$2.00.**

MOJAVE (Pat.) 1954 AARS Winner.

Named for California famous desert, being glowing orange shot with flame-like tones of scarlet, typical of desert sunset. The many long-stemmed, beautiful tapering buds open to big pleasantly fragrant flowers on vigorous plant. **Each \$3.00**

MIRANDY (Pat.) Strong plant producing deep maroon red blooms with deeper shading; long pointed ovid buds. Beautiful in form and long lasting. Sweetly fragrant. **Each \$2.25.**

MISSION BELLS (Pat.) AARS. Deep glowing salmon opening to clear shrimp pink color. Pointed buds open to high centered very large beautiful blooms. Vigorous grower, good foliage. **Each \$2.25.**

NEW YORKER. (Pat.) Buds slowly open into very large flowers of lasting brilliant red shade composed of scarlet with rose red undertones overlaid with rich velvety sheen. **Each \$2.00.**

NOCTURNE. (Pat.) AARS. Bright cardinal red with shadings of crimson. Large petals have good substance and rich texture. Pleasantly fragrant. **Each \$2.00.**

PEACE. (Pat.) A masterpiece, winning the highest score ever given a new rose in the 1946 All American Rose Award! Greatest charm is in changing panorama of color. Large ovid buds are rich gold, edged cerise; as outer petals unfold, the gold changes to canary to pale gold and iridescent cream; cerise edge deepens and becomes broader as flower slowly opens to glorious 5-inch blooms. Everyone should grow this. **Each \$2.50.**

SHOW GIRL (Pat.) Rich deep Phlox-pink blooms on freely branching, upright plants. Beautiful long pink buds for cutting. **Each \$2.00.**

SUTTERS GOLD (Pat.) AARS 1950. Beautiful long pointed yellow buds, richly shaded with orange and red. Rich tea fragrance not found in any other yellow rose. **Each \$2.25.**

TEXAS CENTENNIAL (Pat.) Hoover sport; vigorous. Bright vermilion red with light tone of gold at base. Petals lighter red at center, gradually toning to deep rich pink as bloom ages. **Each \$1.50.**

WILL ROGERS (Pat.) Dark Velvety-crimson maroon; double, free bloomer, dark green foliage. **Each \$1.50.**

Polyantha and Floribunda Roses

Floradora

NON-PATENTED VARIETIES

Dormant, 2 yr. No. 1 Ea. \$1.35.
10 for \$12.50. P. Pd. Each Rate only

CECIL BRUNNER. Bud long pointed, flower small, double, open bright with yellow base. Free blooming, fragrant.

DAGMAR SPAETH. Large trusses of white flowers produced freely all summer on medium height bushes.

ELSE POULSEN. Flowers medium size, semi-double lasting, bright rose pink. Continuous blooming from summer to late fall on erect thrifty plants.

EUTIN. Even strangers will ask you it's name. Very striking double rich red flowers produced with Floribunda abundance on vigorous bush.

FLORADORA. AARS. Fascinating Cinnabar color shaded scarlet and geranium red. Double blossoms; vigorous bushes.

GOLDEN SALMON. Clusters of bright salmon orange flowers produced on bushy well-shaped plants.

IMPROVED LAFAYETTE. Medium sized deep glowing red flowers suffused vivid crimson. Blooms Profusely, flowers of rose crimson.

These will outbloom anything in the rose family all summer long. Very desirable for landscape effect in solid beds, borders, or colorful highlights in the foundation planting. Their bushy thrifty growth averages about 24 inches. Profuse and colorful.

PATENTED FLORIBUNDAS

Dormant 2 yr. No. 1 P. Pd.

FASHION (Pat.) AARS for 1950. Brilliant luminous coral flowers. All season, blooms single and in clusters. **Each \$2.00.**

GOLDILOCKS (Pat.) Profuse clusters of golden-yellow double blooms on compact plants. A delightful addition to yellow Floribunda. **Each \$1.50.**

AARS WINNER 1954

LILIBET (Pat.) This dainty new Floribunda is named in honor of Her Majesty Queen Elizabeth II. Color ranges from light rose pink in the bud to soft dawn-pink in full open flower, bloom continuously on a medium height plant with glossy mildew-resistant foliage. **Each \$2.50.**

MA PERKINS (Pat.) 1953 AARS Winner. A sparkling new color with rich unusual fragrance. Each delightfully shaped bud deep salmon pink with dash of gold flush of red, opens into 2½-2 in. sparkling double, soft coral pink flowers. **Each \$2.25.**

PINKIE. (Pat.) Double rose-pink clusters. Dwarf, bushy. Profuse blooms. **Each \$1.75.**

PINOCCHIO (Pat.) A thrifty plant producing an abundance of pointed buds of salmon-flushed gold opening to miniature hybrid-tea like roses of soft clear pink and in clusters. **Each \$1.50.**

RED PINOCCHIO (Pat.) A sport of Pinocchio with darker rich carmine color. **Each \$1.50.**

VOGUE (Pat.) 1952 AARS Winner. A wonderful new floribunda. It is intense cherry-coral with well-formed 3-4 inch flowers of Hybrid-tea form. The very dark, ovoid buds open slowly to a delightfully fragrant bloom carried in sprays on a dark foliage. **Each \$2.00.**

Climbing Roses

AMERICAN BEAUTY CLIMBER Large double flowers of rose crimson. Each \$1.25.

BLAZE. Popular climber with double scarlet crimson blooms similar to Paul's Scarlet; however, some bloom is produced on two-year wood after the main June crop. Each \$1.35.

DOROTHY PERKINS. Beautiful shell-pink flowers are borne in large clusters of small double blooms; sweet scented. One of the thriftiest of standard climbers. Each \$1.25.

DR. J. H. NICHOLAS (Pat.) Everblooming climber of pillar type that has large fully double deep rose pink 5-6 inch long flowers on long stems. Foliage rich dark green. Judicious fertilizing will encourage progressive growth with the succession of bloom. Each \$2.00.

GOLDEN CLIMBER. Long gracefully shaped golden yellow buds open into rich yellow Tea-like blooms in June-July on long stems. Each \$1.35.

HIGH NOON (Pat.) The intense shade of clear shining yellow displayed in medium sized well-shaped buds on long stems with glossy light green foliage. High Noon produces a big crop in Spring, continuing throughout the entire growing season. Each \$2.50.

NEW DAWN. Everblooming. An exceptional climbing rose that produces a fine display of double flesh pink blossoms on long stem through June, and then as the summer goes along, new buds and flowers continue until frost. Each \$1.35.

Paul's Scarlet

PAUL'S SCARLET. For brilliant color this rose is unsurpassed. Produces clusters of semi-double vivid dazzling red blossoms. Each \$1.25.

Shrub Roses

AUSTRIAN COPPER

The brilliant shrub rose loaded with single blossoms in June — orange-red with yellow on the outside of petals. Grows 5-6 ft. high, very hardy does not freeze back.

Two year select size, each \$1.50.

HARRISON'S YELLOW. The charming old favorite hardy yellow bush rose you have seen blooming in dooryards about Decoration Day. Bears semi-double bright yellow flowers profusely on about five foot bush.

Two year select size, each \$1.50.

COVER COLLECTION

The three AARS Winners Chrysler Imperial 1953 and Mojave 1954, Lilibet 1954 featured on the front cover. Catalog value of 1 each \$8.25.

Special collection price 1 each \$7.25 Post Paid.

Potted Roses

Experience and tests made the past few years, by us and other Nurseries in the region, have proven the practical and desirable use of Roses established in containers to supplement the spring planting of dormant bushes in April and early May. As our patrons become acquainted with the ease of planting Potted Roses and the convenience in selection that this method of handling affords, we are yearly increasing our offering to supply the demand. We will have an almost complete selection of our Everblooming Hybrid Tea, Floribunda and Climbing Roses established in containers ready for your selection while in bloom from June throughout the summer and fall.

The successful use of Potted Roses has encouraged expanding this method of establishing nursery stock in containers to also include nearly all the Perennials, Trees, Shrubs and Evergreens described in this catalog. Complete landscape plantings made with container established material, in every month during the past summer by our planting crew, without the loss of a single plant indicates the practical and desirable use of the method to supplement the normal spring planting of dormant plants.

In our Display Yard, along with the Potted Roses, we will have Perennials, Vines, Mums, Evergreens, Shrubs, and smaller Trees all established in containers growing in full leaf or bloom, for your selection and successful planting any time at your convenience during the summer and fall. (See page 13.)

HARDY GARDEN CHRYSANTHEMUMS

AN ADDED MONTH OF FLOWERS NOW MAKES INDIAN
SUMMER A MOST COLORFUL SEASON OF
CHRYSANTHEMUMS

The varieties here listed have consistently reached mature blooming season here at Loveland where the first light frosts are expected about Sept. 21, and hard frosts conclude the mum season about Oct. 21. Chrysanthemums are resistant to light frosts. The Cheyenne, Wyo., Horticultural Field Station (6,100 ft. alt.) has grown many of these varieties and introduced the following varieties indicated as U.S.D.A. We suggest varieties according to altitudes as follows: from 6,500 to 8,000 ft. — Roza, Pink, Bronze and Yellow Cushion, White Gull, Pygmy

Gold, Manatico; from 5,500 to 6,500 ft. — most any variety blooming in September or earlier; less than 5,500 ft. — all varieties in this list.

Height of plants when in bloom is stated after each variety. This is for comparison and will vary depending on location, soil, watering. Plants usually grow a little taller the second year. Chrysanthemum plants usually take until May 1st to establish sufficient growth before transplanting. **Priced Postpaid.**

CUSHION TYPE MUMS

Make low plants, broader than tall, covered with solid mass of flowers in full bloom. Pink Cushion and its relatives are also advertised as "Azalea-mums."

ARIKARA (12-14 in.) U.S.D.A. Reddish-bronze with 2½-3 in. semi-double flowers borne in profusion. Early Sept. Each 50c; 3 for \$1.25.

BRONZE CUSHION. Same type as "Pink Cushion" except for color. Deep bronze turning to coppery yellow. Each 50c; 3 for \$1.25.

CANARY (21-14 in.) Compact mound of exceptionally large double rich light yellow flowers. Sept. Each 60c; 3 for \$1.50.

CODY (8-10 in.) A very dwarf large flowering lavender with a cream center. Less than 12 in. high. Late Aug. on. Each 60c; 3 for \$1.50.

REMEMBRANCE (24 in.) Deep ruby-carmine double that retains color. Frost resistant. Late Sept. Each 60c; 3 for \$1.50.

ROSITA (24 in.) Very compact light Persian rose button pompon. Sept. Each 50c; 3 for \$1.25.

ROSIKA (20 in.) Shapely double 2½ in. pink with faint suggestion of salmon shading. Each 50c; 3 for \$1.25.

SEPT. DAWN (24 in.) A bright lively 2¾ in. double pink retaining color over long period. Late Sept. Each 50c; 3 for \$1.25.

SEPT. ROSE. Kroh Bros. introduction 1950. (21 in.) U.S.D.A. Early hardy, profuse, long lasting 2½ in. double blossoms opening attractive rose pink. Early Sept. Each 50c; 3 for \$1.25.

SUNAPEE (22 in.) A golden yellow. Very early and popular among our visitors. Sept. Each 50c; 3 for \$1.25.

WAKU (24 in.) U.S.D.A. Double pure white 2½-3 in. flowers of distinctive petal formation. Rich green foliage. Each 50c; 3 for \$1.25.

SPOON TYPE

These are unique in their tubular petals, the outer tips of which open into a cupped spoon shape.

CARDINAL SPOON (18-20 in.) An outstanding different cardinal red with straw-yellow tubes. Early Oct. Each 60c; 3 for \$1.50.

CHARM SPOON (18-20 in.) Opens lovely rhondite red and fades gradually to rich rust rose. Excellent growth habits. Very free flowering. Early Oct. Each 60c; 3 for \$1.50.

ORCHID SPOON (24 in.) Spoon type of very charming intriguing effect in a double orchid-pink flower. Sept. to early Oct. Each 60c; 3 for \$1.50.

ENGLISH TYPE

This new strain has flowers that average much larger than the majority of the hardy garden varieties. By disbudding all but the main blossoms, maximum size can be attained.

ALABASTER (24 in.) Large white-blossoms, slightly incurved; 4 to 5 in. blooms without disbudding. Each 50c; 3 for \$1.25.

DAILY EXPRESS (22 in.) Opens as an orange-bronze-red shade maturing to soft glowing orange-yellow with yellow glow in center; 3½-4 in. blooms without disbudding. Each 60c; 3 for \$1.50.

GOLD STANDARD (28 in.) Fine deep yellow with slightly incurved petals, 4-5 in. blooms without disbudding. Late Sept. Each 60c; 3 for \$1.50.

H. SUTCLIFF (26 in.) Very similar to Gold Standard in color and bloom type. Has proven hardier with us. Each 60c; 3 for \$1.50.

MRS. E. PATTIE (20 in.) Interesting shade of terra-cotta red with gold reverse; rather broad incurving petals. Attains about 3½ in. size without disbudding. Late Sept. Each 60c; 3 for \$1.50.

ORANGE GLOW (24 in.) A beautiful blend of orange-bronze with gold on the reverse side of petals. Very compact 2¾ in. blossoms without disbudding. Early Oct. Each 60c; 3 for \$1.50.

REVELLER (22 in.) Striking 3 in. blossoms of glowing orange-red with gold center. Late Sept. Each 60c; 3 for \$1.50.

We will have an almost complete selection of our Chrysanthemums established in containers on display at the Nursery during the summer and fall. Selection may be made during the summer from illustrations at the office or from the plants in bud or bloom in fall. (See page 13.)

PERENNIALS

ONCE PLANTED WILL CONTINUE TO BLOOM YEAR AFTER YEAR

Most Perennials require an open, sunny situation to thrive and show at their best. Soil should be well drained rich garden loam, and enriched each year with an application of well-rotted manure used as a mulch in the fall. Apply the mulch after the ground is frozen.

Prices of Perennials, unless otherwise indicated 50c each; 3 alike for \$1.35; 6 alike for \$2.50; 12 alike for \$4.75. Post Paid.

Bleeding Heart

BABY BREATH, Bristol Fairy (2 ft.) Large panicles, purest white double flowers.
2 yr. No. 1 Each 90c P. Pd.

BLEEDING HEART (2 ft.) Ever popular plant, pink heart shaped flowers on graceful arching stems. May-June. 5-8 eye roots, each \$1.10 P. Pd.

COLUMBINE, Mrs. Scott Elliott Hybrids (2 ft.) Beautiful long spurred flowers, variety of pastel colors. June-July.

DELPHINIUM Belladonna (4 ft.) Long spikes, clear turquoise blue; blooms from July till frost if first spikes are out.

DELPHINIUM Bellamosa (4 ft.) Habit of growth much like Belladonna, but flowers dark blue.

DELPHINIUM HYBRIDS. Large flowers of varied blue-pastel shades.

PYRETHRUM Painty Daisy (18 in) Daisy-like flowers in various shades of pink, fern-like foliage; May-June.

QUEEN CITY. Unequalled color in any flower. Scarlet pink. Blooms early continually until frost. Ball shaped.

WATCHUNG GIANT. Deep amber-yellow suffused orange on strong stems. Very large grower.

GLADIOLUS BULBS

Loveland Glad Gardens is now a division of Kroh Bros. Nurseries. Loveland Glad Gardens has supplied bulbs of choice varieties to many satisfied customers in this area and throughout the country. Varieties listed are carefully selected for their beauty, vigor, and dependable performance.

Glad's are quite easily grown and are not exacting as to soil. For best results we suggest they be planted in rows of 18 to 24 inches apart with about 3 large bulbs or 5 to 6 medium bulbs per lineal foot. Of most importance is the planting of good varieties and young vigorous bulbs.

We offer in this listing two sizes "large" and "medium"; both bloom quite freely with average care. A large bulb should produce a little taller spike with from 2-4 more buds. Small size and bulblets available on inquiry.

PRICES quoted are Post Paid on orders of \$3.50 or more. Smaller orders add 10% for postage.

GLADIOLUS BULBS are measured in diameter only. Large (L) 1 1/4 inch up. (Medium (M) 3/4 inch to 1 1/4 inch.)

Newer Glads

Our selection of the more recent introductions are very beautiful and reliable, well worthy of your consideration.

Choice Varieties

The following group of choice varieties being our selection of the slightly older and better known are all moderately priced.

L 2 for 25c; M 4 for 25c

BEAUTY BLUSH. Sparkling cool, soft blushing pink. Recurved florets, stiff stem.

BUCKEYE BRONZE. Rusty ruffled bronzy orange. Very popular glad.

CONNIE "G". Entrancingly beautiful heavily ruffled clear cream.

CRACKER JACK. Deep orange yellow, 16 buds, 6 open with good texture.

CRINKLE CREAM. Beautiful large ruffled clear light yellow.

DAISY MAE. Beautiful orange pink, cherry blotch. Tall husky grower.

ELMER'S ROSE. A highly ruffled true rose with purple feather in throat.

EVANGELINE. A very tall huge light rose with cream throat.

FLORENCE NIGHTINGALE. Fine ruffled clear white, light cream throat.

FLYING FORTRESS. Hugh lavender-grey, small red blotch.

FRIENDSHIP. Beautiful pure ruffled pink, waxy cream and white throat.

GOLDEN ARROW. Tall clear light yellow. Opens 8 recurved florets.

INDIAN SUMMER. Smokey burnt orange, edged plum, red marking on lower petals.

LIPSTICK. Beautiful ruffled shell pink, bright rose red plumes in throat.

MARATHON. Strong growing light buff red throat marking.

MID AMERICA. Clear brilliant light red, opening 7 huge 6-in. florets.

MY DEAR. Nice early ruffled medium size pink, lots of sparkle.

NANCY. Rich medium red, darker throat, opening 7 florets well balanced spike.

OCTOBER SUNSHINE. Tall orange, golden-yellow throat. Recurved florets.

PACTOLUS. Ruffled apricot-cream with striking orange-red blotch.

PARTHIENA. A giant ruffled deep lavender.

PATRICIAN. Medium shade of lavender. Healthy plant with large flowers.

PATROL. Very beautiful clear apricot with golden throat.

POET'S DREAM. Ruffled miniature, light lavender, creamy white throat.

QUIBERON. Nicely ruffled clear peach buff. Strong grower.

RAVEL. Violet blue, reddish brown throat. Tall straight spike. Healthy.

R. B. Huge smoky brown florets on tall strong plants. A popular smoky.

RED CHERRY. Brilliant cherry red, slightly darker throat. One of the best reds.

RED WING. Fine ruffled scarlet opens up to 10 large florets.

ROBINSON CRUSOE. Tan, heavily marbled deep rose-chocolate, striking color. Novelty.

SILVER COURT. Pure white, no trace of cream. Plain petaled florets, average spike.

SPIC & SPAN. Tall ruffled pink. Nearly perfect growth, spike and placement.

TUNIA'S MAHOMET. Large smoky plum-rose, orange feather. Odd but beautiful.

WILD TIGER. Reddish brown, deep brown stripes. Resembles a tiger lily.

Standard Varieties

This group of varieties contains several of the older well-known proven performers. We have continued listing these because of their outstanding qualities with ability to provide you with an admirable Glad Garden at a more reasonable price.

L 3 for 25c, M 5 for 25c

ANNAMAE. One of the earliest as well as one of the whitest glads.

BIG TOP. Really immense in size. Light pink, small carmine feather.

BLACK OPAL. Dependable dark red. plenty open, plenty large.

BLUE BEAUTY. Very popular and vigorous. Old reliable, medium blue.

BURMA. Deep ruffled reddish rose opening 6-8 florets, straight spike.

ELIZABETH THE QUEEN. A very clear lavender, darker throat lines. Very ruffled.

GLOW. Beautiful shade of soft clear orange. Early.

GOLD DUST. Very early deep yellow. An old variety, but quite good.

KEEPEE. Tiny cute bright red velvet, edged cream. A miniature.

KING LEAR. Tall early ruffled purple. Very reliable and popular.

LAVENDER PRINCE. Tall soft deep lavender. Good cutter, show winner.

MYRNA FAY. Early orchid lavender opening 10 florets, willow stright spike.

ORANGE GOLD. Genuine orange-self, large florets. Very healthy.

OREGON ROSE. Beautiful three-toned ruffled rose. 8-10 open.

PANDORA. Beautiful clear, soft geranium pink, darker lines in throat.

PHANTOM BEAUTY. Shell-pink, medium-sized 10 open on beautiful spike.

RED CHARM. Deep sparkling clear red. Wonderful growing habits.

GLADS—Continued

SPOTLIGHT. Very large medium yellow, small scarlet blotch.

VAGABOND PRINCE. Mahogany brown flame blotch. An old favorite.

VALERIA. A velvety softer tone light red. Very strong grower.

WEDGEWOOD. A waxy medium size ruffled lavender, rich cream throat.

WHITE GOLD. A huge cream. Very popular as a garden glad.

Information regarding shipping, etc., on page inside front fly leaf. Please read.

If necessary substitute with nearest smaller () or larger () sizes of the same variety; or substitute with a similar variety of a similar size (). Please check your preference. **See other side.**

We prefer not to substitute and will not do so without the customer's permission. However the demand of some items at times exceeds expectations before the end of the season.

If you have approved substitution on the other side of this order we shall use such size or variety that comes nearest if we happen to be out of your preference. Where larger alternate size is approved a net difference will be charged; likewise any difference due customer will be refunded. Where there is no suitable substitute, or if you have not instructed us to substitute, the full amount of any item not in stock will be refunded.

All stock is offered subject to supply and items are reserved in the rotation in which orders are received.
